Bowden, Ab.

## Is the defender the right choice for you?

The new defender designed and manufactured by Wildcat Fire Services Inc. was developed with you in mind. The primary function of this unit would be for initial suppression before help arrives to protect your largest investment. The defender has a purpose on any campground, acreage, ranch/farmland, lodges, resorts and any other remotely located area with a fire risk.

## What can the defender offer?

The defender will come fully equipped as a ready to use fire suppression trailer.

With the basic package you will receive a trailer with a 145 gallon water tank coupled directly to an 85 PSI pump. Your hose reel comes with 100' of 5/8 fire hose and nozzle. You will also receive 50' of 1 1/2" quick connect fire hose with a nozzle. Gear storage was also considered with an aluminum checker plate top shelf.

Wildcat Fire Services Inc. has also designed a higher pressure model. The trailer and accessories remain the same but the pump pressure will increase from 85 to 120 PSI!

We do not encourage putting yourself in danger but this product will give you a leg up and a head start in saving your investment.
